

MUHAMMAD GHAZARIZ

TECHNICAL PRODUCT MANAGER | PRODUCT MANAGER | PROJECT / PROGRAM MANAGER

Depok, East Java, Indonesia | +62 895 3341 10951 | m.ghazariz@gmail.com | linkedin.com/in/ghazariz

PROFESSIONAL SUMMARY

Product and technology professional with experience spanning frontend development, product and project management, IT department leadership, developer education, and online community operations. Head of Information Technology Department at Minilemon Technology since 2024, with product and IT leadership experience at Minilemon since 2022. Experienced in translating business and user needs into product strategy, PRDs, roadmaps, MVP scope, user flows, role and permission models, implementation plans, and technical delivery. Community leadership background includes management of a 40,000+ member community with 20% year-over-year engagement growth, alongside frontend mentoring and technical content production.

EXPERIENCE SUMMARY

Product / IT Leadership: 4+ years across Minilemon product management, IT leadership, product strategy, and delivery responsibilities.

Project Management: 4+ years across Virtual Moves Co and Minilemon project delivery, cross-functional coordination, and implementation planning.

Community Management: 5+ years across WPU and CODEPOLITAN, including large online developer and learning communities.

Frontend Development: 5+ years of freelance frontend work from 2019 to 2025, plus ongoing technical mentoring since 2022.

Frontend Mentoring: 3+ years guiding Kelas Fullstack learners through frontend concepts, projects, troubleshooting, and implementation.

Additional Experience: Game Design (2+ years), Web Copywriting, Product Design / UI-UX decision-making, HR and organizational operations, Audio Engineering.

PROFESSIONAL EXPERIENCE

Head of Information Technology Department | Minilemon Technology | May 2024 - Present

Full-time | On-site | Surabaya, East Java, Indonesia

- Lead product and technology planning across internal digital products, creative-technology initiatives, and external technology projects.
- Translate business and user requirements into product scope, PRDs, roadmaps, MVP phases, user flows, role and permission models, approval workflows, and implementation plans.
- Coordinate work across engineering, product, UI/UX, HR, branding, marketing, vendors, institutions, and external partners; support prioritization, delivery tracking, and decision documentation.
- Guide recruitment and internship workflows, KPI and evaluation processes, team structure, documentation standards, and organizational systems for a remote-first technology environment.
- Evaluate and coordinate technical infrastructure including React/TypeScript applications, APIs, Cloudflare Workers/Pages/D1/R2, Git/GitHub, Docker, Linux/VPS environments, media storage, and real-time communication services.
- Oversee product and technical work for Minilemon Learning System, ML Space, Miniboard, museum digital platforms, and centralized content-management workflows.

Product Manager & IT Lead Team | Minilemon Technology | Jan 2022 - Apr 2024

Product & Technology | Indonesia

- Led a cross-functional IT team through product ideation, development, and launch activities.
- Managed product lifecycle work including product strategy, roadmap development, feature prioritization, and user experience decisions.
- Directed programmers including game and mobile development contributors, delegated work, provided technical guidance, and monitored delivery quality and timing.
- Prepared product-facing documentation and webpage content explaining value proposition, key features, and intended user benefits.

Frontend Mentor | CODEPOLITAN | Oct 2022 - Present

Full-time | Remote

- Guide Kelas Fullstack members through online frontend learning sessions and support project-based learning and troubleshooting.
- Mentor learners across HTML, CSS, JavaScript, React, Git/GitHub, API integration, and frontend implementation concepts.
- Review learner work, identify implementation issues, answer technical questions, and provide practical feedback during project development.

Lead Community Manager | CODEPOLITAN | Feb 2022 - Jan 2026

Full-time | Bandung, West Java, Indonesia

- Led online community engagement for developer and learning communities, coordinating communication between learners, mentors, moderators, volunteers, and program teams.
- Managed community programs, discussions, support activities, and recurring engagement initiatives across online channels.
- Managed a 40,000+ member community with 20% year-over-year engagement growth and coordinated moderators and volunteers.

Web Copywriter | CODEPOLITAN | Sep 2022 - Sep 2023

Full-time | Remote

- Produced more than 100 educational articles covering programming, frontend development, digital learning, and related technology topics.

- Translated technical topics into accessible learning content aligned with CODEPOLITAN audiences and community needs.

Project Manager | Virtual Moves Co | Nov 2021 - Mar 2025

Part-time | Indonesia

- Coordinated project planning, creative and technical collaboration, task delivery, and communication for a digital creative initiative.
- Converted project ideas into actionable work, tracked progress, supported contributors, and maintained focus on delivery quality and timelines.

Community Manager | WPU Discord Server | Sep 2020 - Mar 2025

Freelance / Volunteer | Indonesia

- Helped manage a Discord-based developer community, supported members, facilitated discussions, and collaborated with other community contributors.
- Supported recurring community activities and monthly events designed to maintain member participation and a constructive learning environment.

Frontend Web Developer | Freelance | Aug 2019 - Mar 2025

Freelance | Remote

- Built and maintained user-facing websites, translating brand, content, and business requirements into responsive frontend interfaces.
- Worked with frontend technologies including HTML, CSS, JavaScript, React, Git/GitHub, REST APIs, and related web-development tooling.
- Collaborated directly with clients or project stakeholders to clarify requirements, iterate on user experience, and deliver web outputs.

SELECTED PRODUCT & TECHNOLOGY PORTFOLIO

Minilemon Learning System (MLS): Defined product requirements, role structures, phased roadmap, workflow, learning features, assessment, reporting, payment concepts, bootcamp/institution models, and future real-time learning capabilities. The latest product direction emphasizes a web-first education platform with PaaS, bootcamp, and marketplace components.

ML Space: Developed product workflows for a gamified parental monitoring and educational screen-time concept involving parent, child, teacher, and school roles; work included requirements, UX flows, permissions, and phased product planning.

Miniboard: Designed an internal KPI and reward system using experience points, levels, leaderboards, badges, approvals, performance evaluation, and reward redemption for distributed teams and internship programs.

Centralized Museum CMS: Planned a centralized content workflow for three museum websites using React + TypeScript public sites and Cloudflare Pages, Workers, D1, and R2 for administration, API, database, and media storage; defined writer/reviewer permissions and publishing workflow.

Virtual Academy / Interactive Learning: Explored a later-phase virtual learning environment connected to MLS, including 2D/3D spaces, voice chat, whiteboard, class access, tasks, and group activity workflows; evaluated Godot, PhaserJS, and PixiJS for interactive delivery.

Game & Mobile Product Initiatives: Coordinated game and mobile developers as part of Minilemon product work, including task delegation, technical guidance, quality oversight, and product communication.

CORE SKILLS

Product Management: Product strategy, product lifecycle, PRDs, roadmaps, MVP scoping, product discovery, market research, feature prioritization, requirements analysis, user flows, role and permission design, approval workflows, pricing concepts, stakeholder management.

Project & Delivery: Project management, implementation planning, timeline and delivery coordination, cross-functional collaboration, quality review, risk and trade-off analysis, technical documentation, remote-team execution.

Leadership & Operations: Management, Team Leadership, Organizational Leadership, Human Resources, recruitment workflows, internship programs, KPI and performance systems, team structure, vendor and partner coordination, process design.

Community & Education: Community Management, Discord community operations, member engagement, event coordination, moderator/volunteer management, frontend mentoring, technical education, learner support, web copywriting, content planning.

Frontend / Web: HTML, CSS, JavaScript, TypeScript, ReactJS, React Native, Vite, REST APIs, Node.js, Express, Git, GitHub, responsive web interfaces.

Cloud / Infrastructure: Cloudflare Workers, Pages, D1, R2, Docker, Ubuntu/Linux, VPS, SSH, S3-compatible storage, environment variables, deployment coordination.

Data / Backend Familiarity: PostgreSQL, MySQL, NoSQL, Firebase, Supabase, API and database workflow planning.

Game / Interactive: Game Design, Godot, PhaserJS, PixiJS, Roblox Studio, multiplayer/voice integration concepts, web export.

Tools: Discord, Google Docs, Google Slides, Google Drive, Notion, Canva, Trello/ClickUp, Huly, AI coding agents for planning, prototyping, analysis, and development workflows.

Additional: Product Design / UI-UX decision-making, Web Development, Management, Audio Engineering, technical writing, stakeholder presentations, external collaboration.
